SUMMARY

Product-focused UI/UX Designer with a Bachelor of Science in Computer Technology and 2+ years of experience designing scalable digital products. Fluent in Swahili and English, I leverage research-driven design and AI-assisted tools to solve complex problems for the African market. Expert in Figma, front-end prototyping (HTML/CSS), and building accessible, end-to-end user experiences for both consumer and enterprise applications.

SKILLS

- **UX & Product Design:** Interaction Design, Prototyping, User Research,.
- **Design Tools:** Figma, Canva, AI Studio, ElevenLabs, Veo 3, Nano Banana AI, VS Code, Claude AI
- **Web Development:** HTML, CSS, WordPress
- **User-Centered Design:** Information Architecture, Design Thinking, User Journey Mapping, Flow Diagrams, Design Systems, Wireframing
- **Mobile Design**: Native iOS Applications, Responsive Design

WORK EXPERIENCE

UI/UX Designer
Dproz (Career & Recruitment Technology Platform)
September 2024 - Present

- Led the design of core platform features including FitCheckMe, Role Explainers, One-Click Apply, and Smart Profile (DSP), improving candidate engagement and application completion rates.
- Designed resume review systems for both mobile and web platforms, providing structured AI-driven feedback to users.
- Created the Applications Tracker for candidates, enabling real-time tracking of job applications and hiring progress.
- Led the UI/UX design for the ShopXray platform, streamlining complex business workflows by designing intuitive modules for customer Visits, Appointments, Expense tracking, and Staff & Paycycle management significantly reducing friction in daily business management tasks.
- Produced branded social media content using AI voice, video, and visual tools like Canva, increasing audience reach and engagement.
- Managed and optimized Dproz social media platforms through consistent design systems and content strategy.
- Collaborated closely with product managers, developers, and stakeholders to align design solutions with business goals.
